

BIOVID IS HIRING

Since day one, BioVid's formula for success has been to foster a collaborative, supportive culture where incredibly talented people are encouraged to be the best at what they do.

If you are an experienced strategist and market researcher who is inspired by multi-disciplinary collaborations, organizational and personal growth, and doing good work that supports a greater good, we encourage you to explore our Research Director role.

From excellence in research design and expertise in methodology, to the ability to challenge status quo, to the application of insight from Behavioral Science, this role is a great fit for someone who loves research, cherishes creative thinking, and thrives on the kind of camaraderie that emerges from leading talented, multi-disciplinary teams through intellectually engaging initiatives.

WHAT YOU'LL DO

While we invite applicants to help expand our thinking about the role based on what they can bring to us, the core duties of a Research Director at BioVid currently involves:

- Manage project teams. Ensure outputs delight and inspire clients and their stakeholders.
- Develop and evolve standards for all aspects of both quantitative and qualitative research studies.
- Oversee projects to ensure they stay in scope, on budget, and on time.
- Roll up your sleeves and perform nitty gritty project work as required.
- Play a leading role on internal initiatives that align with career ambitions (e.g., knowledge capital development, staff trainings, product development, method development).
- Serve as a mentor and model for junior staff, including development of project-related skills and identification of advancement opportunities.
- Craft compelling deliverables and present them to clients.
- Contribute to creative and effective project designs and world-class proposals while collaborating with Strategists, Social Scientists, and fellow Researchers.

WHO YOU ARE

Who you are matters to us as much as what you do.

A BioVidian playing the role of Research Director has the following traits and qualifications:

- Deep sense of humanity and humor, especially during busy times.
- Courage and flexibility to explore new territories and tackle "new" challenges.
- Joy in exploring big ideas and applying them to real-world challenges.
- Penchant for creative problem solving and raising the bar.
- Experience and excitement for both qualitative and quantitative research. (experience with advanced quantitative methodologies and analytics a plus).
- Enthusiasm for managing and mentoring junior staff.
- Advanced degree in relevant field highly preferred.
- Experience in healthcare market research ideal.
